Technical information

Color – Dispenser: Black
Color – Reservoir: Translucent white - with level indicator
Capacity – Reservoir only: 1000-mL
Total capacity: 5000-mL (with 4000-mL refill tank)

Instructions for use

Attach the mounting (back) plate to the wall. Dispenser/reservoir unit locks into the bottom portion of the mounted plate. With the foil seal down, align the 4000-mL refill tank with the middle and upper tracks on the back plate. Push and slide the refill tank down into the tracks. This locks the hand cleaner refill into position and breaks the foil seal on the container.
